

ME

International Journal of

APPLIED MECHANICS

AND

ENGINEERING

Special issue on Computational Mechanics

*Guest Editors: Helge I. Andersson
Bjørn Skallerud*

2002

Volume 7

Number 1

ISSN 1425-1655

**University Press
Zielona Góra, Poland**

Contents

Prefaces	5
A.H.Clausen, O.S.Hopperstad and M.Langseth Stretch bending of aluminium extrusions	7
A.Hallanger, K.-E.Frøysa and P.Lunde CFD-simulation and installation effects for ultrasonic flow meters in pipes with bends	33
K.Herfjord, G.Olsen, T.Kvamsdal and K.M.Okstad Fluid-structure interaction in the case of two independent cylinders in vortex induced vibrations (viv)	65
A.E.Holdø Industrial applications of computational fluid dynamics	85
K.Trulsen, B.Spjelkavik and E.Mehlum Green water computed with a spline-based collocation method for potential flow	107
T.Weydahl, M.Bugge, I.R.Gran and I.S.Ertesvåg Computational modeling of nitric oxide formation in biomass combustion	125
S.D.Knutsen, O.G.Dahlhaug, M.Kjeldsen and B.Børresen Jr. Turbomachinery calculations at highly off-design conditions	143
T.Aukrust Numerical simulation of aluminium extrusion with a Lagrangian FEM code	157
L.Furuberg Computational challenges in MEMS	173
H.P.Langtangen and G.Pedersen Propagation of large destructive waves	187
S.Sjöström, J.Burman and M.Jinnestrand Lifetime prediction of gas turbine components with thermal barrier coatings, using micromechanics	205
K.V.Høiseth Mechanical modelling of quasi-brittle shear failure	221
G.Skeie and A.C.Damhaug Load transfer in ship wave analysis	245
M.Chiesa, E.Østby, B.Skallerud and Ch.Thaulow An engineering methodology taking into account the effect of local damage on the global behavior of surface cracked shell structures	267
