ELSEVIER

# NON-LINEAR STATIC AND CYCLIC ANALYSIS OF STEEL FRAMES WITH SEMI-RIGID CONNECTIONS

## CONTENTS

- |            |  |
|------------|--|
| Chapter 1  | Behaviour, analysis and design of steel frames                               |
| Chapter 2  | First-order linear elastic analysis for rigid and semi-rigid frames          |
| Chapter 5  | Second-order elastic analysis by Newton-Raphson method                       |
| Chapter 4  | Non-linear solution techniques   |
| Chapter 5  | Connection behaviour and models  |
| Chapter 6  | Non-linear static analysis allowing for plastic hinges and semi-rigid joints |
| Chapter 7  | Cyclic behaviour of flexibility connected elastic steel frames               |
| Chapter 8  | Transient analysis of inelastic steel structures with flexible connections   |
| Appendix A | List of matrices   |
| Appendix B | Instructions on use of the computer program GMNAF-ED                         |
