**Fire Division CPD Training Course 2017**  
Organized by the Hong Kong Institution of Engineers - Fire Division

**Programme Highlight**
The training course consists of six lectures covering the six domains of fire engineering with case studies, which extends the Fire Division CPD Training Course 2017 and is suitable for professional engineers ranging from graduate engineers to veterans who are interested to join the Fire Discipline of the HKIE. It covers a wide range of knowledge from building design, statutory submission to facility management. We are honored to have eminent academics, experienced professionals, senior consultants and government officials who possess substantial practical experience to introduce concepts of fire engineering including fire science, human psychology and physiology, fire prevention and protection analysis, passive fire protection systems, fire legislation and codes, as well as, fire safety management were extensively covered. Prominent fire professionals and the audience lively exchange their views and ideas towards different topics.

The course is specially tailored for a full spectrum of fire engineering-related professionals such as consultants, surveyors, architect, project managers, facility managers and engineers of other disciplines, who interact frequently with fire engineers or have been practicing fire engineering works and would like to better equip themselves by taking a closer look at the doctrines of Fire Engineers or the latest fire engineering knowledge through case studies.
